PROFILE

Engineer and PMO / transformation professional with 8 years of experience across industrial, technology, energy and public-sector environments. Experienced in programme governance, multi-workstream coordination, executive reporting, KPI frameworks, risk management, process improvement and stakeholder alignment. Track record supporting complex transformations for Airbus Secure Land Communication, Renault Group, GTT, TotalEnergies, VINCI Autoroutes and SANEF.

CORE CAPABILITIES

PMO & programme governance Governance forums - planning - milestones - RAID - escalation	**Performance & reporting** KPI frameworks - dashboards - executive reporting - decision support
Transformation delivery Multi-workstream coordination - Agile - DevOps - change & adoption	**Process & quality governance** BPMN - ISO 9001 - PDCA - business requirements - controls

PROFESSIONAL EXPERIENCE

LYDE Conseil — Sep 2023 - Sep 2026
IT Consultant - Transformation & Governance

Consulting engagements across IT governance, PMO, business analysis, quality and transformation.

GTT - IT Quality & Governance Lead — May 2025 - Sep 2026

- Designed and structured an IT Quality Management System covering governance, projects, operations and security, aligned with ISO 9001 principles.
- Mapped IT processes in BPMN, clarified responsibilities and introduced process reviews and management-review inputs.
- Defined an IT KPI framework and dashboards spanning project, operational, security and stakeholder-satisfaction performance.
- Established risk assessments, control plans and a PDCA-based continuous-improvement approach; contributed to restructuring IT communications and defining the communication plan.

LYDE Conseil - Generative AI Working Group Lead — May 2025 - Sep 2026

- Led governance and fortnightly project reviews for an internal GenAI initiative; prioritised use cases and coordinated delivery through Teams and Planner.
- Structured reusable prompts, RAG knowledge-base practices, source-handling rules and multi-LLM testing across ChatGPT, DeepSeek and Mistral.

VINCI Autoroutes & SANEF - Document Governance / Change — Oct 2023 - Feb 2025

- Assessed the existing document landscape, facilitated target-structure workshops and defined a migration methodology and tracking approach.
- Coordinated migration, testing, user guidance and adoption while resolving synchronisation and access-path constraints.

TotalEnergies - PMO, B2C Mobility Offer — Feb 2024 - Jul 2024

- Supported project governance through committee packs, action tracking and concise progress reporting across multiple workstreams.
- Conducted current-state analysis, a three-competitor benchmark, functional mapping and business-requirements definition for a new mobility proposition.

Metropole du Grand Paris / Ville Renouvelee Mobilite — Jan 2024 - Jul 2024

- Facilitated requirements workshops, produced functional specifications and evaluation frameworks, and supported supplier clarification and selection for a public digital-service procurement.
- Defined requirements and procurement documentation for the deployment of 130 EV charging points, coordinating safety constraints and delivery stakeholders.

Expleo Oct 2018 - Aug 2023
PMO Engineer

Client assignments in aerospace/defence and automotive engineering environments.

Airbus Secure Land Communication - Project Lead / PMO, DevOps Transformation Jan 2022 - Aug 2023

- Structured and coordinated a strategic DevOps transformation programme comprising 12 workstreams, including Forge, Infrastructure as Code, Collaboration & Sharing and Learning / Knowledge.
- Produced the Project Management Plan, established governance forums and escalation routes, and presented consolidated progress to the monthly Steering Committee.
- Supported workstream leads with planning, milestones, actions and Agile routines while coordinating R&D;, IT, security and international stakeholders.
- PMO for the FORGE workstream: coordinated Aforge deployment planning, server dependencies, pilot selection in France and Finland, and Git / Jira / Confluence migration preparation.
- Delivered feasibility analysis for a unified application-production platform, covering needs, solution comparison, migration effort, schedule, investment estimates and supplier proposals.
- Converted DevOps audit findings into governance recommendations and coordinated early phases of a Windows 7-to-10 / Active Directory migration under significant security constraints.

Renault Group - PMO, Transformation & Quality Performance Oct 2018 - Jul 2021

- Supported Engineering platform programmes through milestone governance, quality / schedule / risk indicators, issue escalation and coordination with planning stakeholders.
- Redesigned quality reporting for the model-range quality function, including semi-automated Excel / VBA dashboards, standard KPI packs and an escalation process for non-conformities.
- Embedded Scrum routines for the RLink2 customer-resolution initiative, tracking 10 improvement initiatives and coordinating Quality, Engineering, IT, Purchasing and suppliers.
- Led a customer-log collection initiative from requirements through IT / Quality coordination and GDPR considerations; prepared monthly reporting for the EVP Quality.
- Consolidated regional customer-quality indicators and supported definition and publication of global QP2020 objectives.

EDUCATION & CREDENTIALS

EIGSI - General Engineering Degree
Diplome d'ingenieur generaliste - 2018

Professional Scrum Product Owner I (PSPO I)
Scrum.org
